1.0 Perforated Aluminium & Stainless Steel Trays

Perforated aluminium and stainless steel trays, suitable for use in vacuum and non vacuum autoclaves in two sizes – “Standard” 28cm x 18cm and “Examination” 18cm x 14cm.

“Examination” trays, holding enough instruments for regular check up procedures, can be assigned to individual patients, without compromising the capacity of the autoclave.

Aluminium trays are available in six colours

2.0 HFiT Cassettes – Hands Free instrument Transfer

Hands Free instrument Transfer (HFiT) cassettes significantly reduce the risk of sharps injury whilst ensuring total cleaning and sterilizing efficiency

Available in three sizes, 'Compact', 'Examination' and 'Standard', these innovative stainless steel, self locking, HFiT cassettes securely hold instruments for washer disinfection and sterilization.

HFiT cassettes, with a choice of six coloured silicone inserts, allow the adoption of instrument management / traceability within the surgery environment.
